BLACK ANODIZATION

UNMATCHED AESTHETIC AND DURABILITY

Our black anodization delivers a sleek, sophisticated finish to your systems. This premium black coating not only enhances the visual appeal but also provides exceptional protection against environmental factors. As the market leader in this solution, we offer both unparalleled aesthetics and superior durability.

20 MICRON THICKNESS

With a focus on durability, our black anodization is applied with a 20-micron thickness, ensuring robust protection.

25-YEAR WARRANTY

The black anodization not only enhances the aesthetic appeal but also provides protection against oxidation. Our products are backed by an exceptional 25-year warranty on rooftop applications. This extended warranty underscores our commitment to quality and durability, ensuring long-term peace of mind for our customers.
