

IQ8 Series Microinverters

The high-powered, smart grid ready IQ8 Series Microinverters are designed to match the latest generation high output PV modules. The IQ8 Series Microinverters has the highest energy production and reliability standards in the industry and with rapid shutdown functionality it meets the highest safety standards. The brain of the semiconductor-based microinverter is our proprietary, application specific integrated circuit (ASIC) which enables the microinverter to operate in a grid-connected mode.

IQ Gateway

Part of the Enphase Energy System, IQ8 Series Microinverters integrate with the IQ Battery, IQ Gateway, and the Enphase App monitoring and analysis software.

IQ Relay single-phase and multi-phase
Production and storage circuit, integrated Neutral Sensing-protection device with PLC-Phase coupler (multi-phase) and DC current injection monitoring.

IQ8 Series with Integrated MC4 connectors

Connect PV modules quickly and easily to the IQ8 Series Microinverters that has integrated MC4 connectors.

IQ Cabling

Install microinverters quickly and safely with IQ Cabling. With multi-phase IQ Cabling, the installed capacity is automatically distributed evenly across all three phases.

IQ8 Series Microinverters redefine reliability standards with more than 1 million cumulative hours of power-on testing, enabling an industry-leading limited warranty of up to 15 years, extendable to 20 and 25 years.*

*15-year warranty is valid provided an internet connected IQ Gateway is installed.

			It is recommended to Centre feed IQ Cable within microinverter branch circuits to minimize the voltage rise. These design limits should ensure voltage rise and line conductor resistance on the IQ Cable are maintained within acceptable limits. In locations with risk of high grid voltage at the point of connection, it may be necessary to decrease the maximum number of microinverters on the IQ Cable section by as much as 50%.

(1) Installer should not exceed small-scale technology certificate (STC) limit on PV module wattage for claiming the STC.

(2) Pairing PV modules with wattage above the limit may result in additional clipping losses. See the compatibility calculator at <https://enphase.com/en-au/installers/microinverters/calculator>.
